Description

Ouvrages de référence, ces livres (en français et en anglais) sont édités à l'occasion de la COP21, avec le concours du Programme des Nations Unies pour le développement. 70 contributions présentent les défis du développement humain durable, ceux de l'adaptation au changement climatique de l'Afrique, ainsi que ses potentialités pour une meilleure gouvernance environnementale et la réalisation des Objectifs de développement durable (ODD). Les contributeurs se font l'avocat d'une approche intégrée et multisectorielle: gestion de l'eau, agriculture, exploitations minières, productions d'énergie... La version anglaise offre deux chapitres supplémentaires:

- 1) le financement climatique du développement durable.
- 2) l'analyse de l'Accord de Paris sur le climat signé lors de la COP 21 et ses enjeux pour l'Afrique.
