Description

This publication highlights the main conclusions of the Fishing for Development joint meeting, held in Paris in April 2014. The meeting was organized by the Food and Agriculture Organization of the United Nations (FAO), the Organisation for Economic Co-operation and Development (OECD) and the World Bank (WB) to initiate a dialogue between the fisheries and development policy communities from member and partner countries and organizations of the OECD. It brought together delegates to the OECD Fisheries Committee and OECD Development Assistance Committee, representatives of partner developing countries invited by FAO, as well as experts and representatives from FAO, WB, non-governmental organizations and regional organizations. The meeting focused on issues central to promoting sustainable fisheries and aquaculture in developing, emerging and developed countries alike. This publication also includes the background papers originally prepared to provide context for the issues addressed. It identifies questions for a future work agenda on policy coherence in fisheries and aquaculture, and makes evident the strong need for further dialogue between the fisheries and development communities at global and regional scales.
